SpotChem EZ SP-4430

Instructions to connect to Zafena POC-Workstation

The document describes the connection and labeling of the meter, to work with the Zafena POC-Workstation. Physical connection is between RJ11 and USB-A.
Cable product code:
1x **ZAF-520-13**
1x **ZAF-520-1**

Instrument-tag: LMC-ASE1

Print and stick the instrument tag on to or next to the instrument. Follow the documentation "Quick guide" to perform analysis and submit results.

LMC-ASE1

Procedure

1. Attach the cable ZAF-520-13 to the meter. On the back of the meter there is a socket where the cable connector fits. When connecting, you should hear a click when you insert the cable all the way.

2. Connect ZAF-520-13 serial end to ZAF-520-1 and the USB into one of the USB-ports on the POC-Workstation.

3. To test the connection:
A. Scan the instrument-tag on the meter.
B. Through the meter menu, choose:"Submenu" (press **2**),
then "Result" (press **1**),
then "Send" (press **2**),
then "Latest" (Press **1**).

The transfer starts and the results are presented on the POC Workstation.
